## 1. Introduction

This SIS aims to give a global overview of the most relevant GHS regulations (e.g. safety data sheet, label, and transport regulations) that are currently applicable from a regulatory point of view. All regulations that are currently implemented in ExESS are displayed in **blue font colour**.

## 2. GHS regulations

GHS stands for a system named 'Globally Harmonized System of Classification and Labelling of Chemicals', which addresses the classification of chemicals by types of hazards and has the purpose of globally harmonized hazard communication elements, including safety data sheets and labels. It aims to ensure that information on physical hazards and toxicity from chemicals is available to enhance the protection of human health and the environment during the handling, transport, and use of these chemicals.

The GHS also provides a basis for harmonization of rules and regulations on chemicals at national, regional, and worldwide level. The first edition of the GHS, which was intended to serve as the initial basis for the global implementation of the system, was published in 2003. Since then, the GHS has been revised every two years.

## 2.2. International transport regulations

For the international transport of dangerous goods, the GHS is implemented through the 'UN RTDG Model Regulations' and the following international transport regulations for each transport mode (which are also revised every two years and take account of the provisions of the 'UN RTDG Model Regulations').

<https://unece.org/transportdangerous-goods/international-level>

### Transport of Dangerous Goods

- UN RTDG (UN Recommendations on the Transport of Dangerous Goods - Model Regulations)
  - Recommended in all states without specific transport regulations.
  - <https://unece.org/about-recommendations>

### Air Transport

- IATA (ICAO Technical Instructions for the Safe Transport of Dangerous Goods by Air)
  - Applicable in the 193 states of the Convention on International Civil Aviation.
  - <https://www.iata.org/en/publications/dgr/>

### Maritime Transport

- IMDG (International Maritime Dangerous Goods Code)
  - Applicable in 166 states of the International Convention for the Safety of Life at Sea.
  - <https://www.imo.org/en/OurWork/Safety/Pages/DangerousGoods-default.aspx>

### Land Transport

- ADR (Agreement concerning the International Carriage of Dangerous Goods by Road)
  - Applicable in the 52 contracting states (see the following table).
  - <https://unece.org/about-adr>
- RID (Regulations concerning the International Transport of Dangerous Goods by Rail)
  - Applicable in the 45 contracting states (see the following table).
  - [https://otif.org/en/?page\\_id=1105](https://otif.org/en/?page_id=1105)
- ADN (European Agreement concerning the International Carriage of Dangerous Goods by Inland Waterways)
  - Applicable in the 18 contracting states (see the following table).
  - <https://unece.org/about-adn>

The following table gives an overview of which countries are contracting states of which international transport regulation.

The combinations displayed in a **blue cell** are currently implemented in ExESS.
